The Progressive Kicker by Michael O'Brien (The Time Machine, Hard Cover)

"This is the best Book Test I have ever seen!"
Jack Goldfinger, Entertainment Director at the World Famous Magic Castle

What methods are included?

- Flashback - Know the first word of any page without needing to force the page or even know the page number.
- Flashforward - Know a word on the first line of the next page. Again, without needing to force the page or even know the page number.
- Inception - Rather than fish for a thought of word, you can plant the word you want in the spectator's mind instead! Surefire! Simple! Clean!
- Any Word on Any Page - Allow the spectator to choose a word from anywhere in the book. You don't even need to be holding the book. It can be done completely hands-off!
  No peaking, forcing, or guessing! You can be in the other room when the word is chosen!
  It is so clean!
- The Progressive Book Test - Use a single book to divine 3 thought of words from three different parts of the book at once! Again, no fishing, forcing, or guessing! You instantly know all three words as soon as the spectator chooses a page. Each word gets progressively bigger and more impossible to know!
- Tossed Out Book - Toss out one or multiple books and read 6 spectator's minds at once! Again, nothing to memorize and the words can be chosen from anywhere on the page making this one of the cleanest TOB routines out there!

- Hands-Free Forcing - Force a word or a specific page without needing to touch the book!
- The Kicker Ending - Reveal a thought of word without asking a single question, predict a thought of word before it is even chosen, shoot a bullet or arrow right through the spectator's word, make a page vanish and appear in an impossible location, and more!

Creator's Note: I truly hope you enjoy and find inspiration from these books just like I did! Huge shoutout to Josh Zandman and Kaleb Wade for their contributions and inspirations for what ended up becoming the project you see before you.
