

## Dis Jointed by Joe Russell video DOWNLOAD

**Dis Jointed** is a revolutionary new method for "Shinko's classic Arm Twist" that turns the screws on the scream factor.

**Dis Jointed** gives you the freakish ability to twist your normal arm 360 degrees around with bone crunching sound. Then there's a heart stopping "pop" as you physically break your elbow at the joint! You then complete the dislocation by shoving your shoulder back into your arm socket. The freak-fest ends with one more 360 degree twist of your arm as your shocked spectators watch your bones snap back into place!

- **Dis Jointed** can be performed by anybody with normal body parts.
- No pre-set
- No hand switches
- Not misdirection
- No pain

For the ultimate freak-out, perform Shinko's original arm twist first...and then drop them to their knees with **Dis Jointed!**

Some freaks are born. Others are made.

The best are...**DIS JOINTED!**
