

## Audio Coins to Pocket by Eric Jones video DOWNLOAD

Eric Jones presents a full body close up illusion. This is coin magic at its finest. Four coins are displayed on the palm of the hand. One at a time, the coins are rendered invisible and tossed into the air. As each coins falls, you hear an audible clink in the pocket indicating the moment the coin arrives. This process is repeated until the hands are left COMPLETELY EMPTY, and all four coins are extracted openly from the pocket. No extra coins. No pulls. No hold outs. No gimmicks. The magic is practical for virtually every situation, making this a perfect trick for the casual hobbyist or serious professional. You can even borrow four coins and perform this wonderful piece of impromptu piece of magic.

This is Audio.
