

Sticky by Kevin Schaller and Oliver Smith video DOWNLOAD

Sticky is a video by Kevin Schaller and Oliver Smith that contains 4 strong effects that you can perform using chewing gum. All the effects are very practical, organic, easy to perform and will leave your spectators astonished.

MentalGum:

Explain that there is only one piece of gum left inside the pack and have a spectator freely select a row and a compartment. Display that the last piece is sealed inside the exact location they just chose.

Torn & Fuzed:

Show a silver pack of gum and a blue piece of foil from another pack. Visually make the blue piece fuse onto the silver foil, leaving it completely examinable and hand it out as an impossible souvenir

Marked:

You mark one compartment of the gum pack as your prediction and have a spectator draw an X onto any compartment on the other side and it matches with your prediction.

Push Through:

Display a piece of gum inside one compartment. Have a spectator cup his hands underneath and visually push the gum through the compartment without any holes or slits.
