

Trixel by Valdemar Gestur video DOWNLOAD

Several years ago we introduced you to Pixel, the visual masterpiece from David Jade that has since become one of our best selling tricks. Then came Trigger and now Valdemar Gestur is back at it with Trixel.

In hindsight, Trixel is the reverse effect to Pixel. Instead of causing a selected card to leap to the top, free from the rubber band, you trap the selection with the rubber band after wrapping it around the entire deck moments before.

The effect must be seen to believe!
