

## Numbers, Cards... and Time! by Carlos Vinuesa - eBook DOWNLOAD

This book gathers together a part of my history with magic, in particular with card magic. Inside you will find a selection of what I consider to be some of the best and most personal material I have developed; in particular, you will discover practical and elegant approaches to the Card and Number effect, my sequence Back to the Future ("Ascanio Prize, Close-up Magician of the Year in Spain" 2010) -including my favorite version of Collectors and version of the Camel Race- and some other neat ideas...

I hope these pages are useful and inspiring for you or that they simply let you know me better.

*Quotes:*

"Carlos is an outstanding pro mathematician and one of the funniest comedians I know. You can guess the kind of magic that results from this combination: Very interesting methods and super-commercial presentations. Just his approaches to the ACAAN plot makes this book worth its price!!!"

"This exquisite work could only come from a clear and eager mind."
