#8 In Devin's Knights Magic Marketing Secrets For Magicians

Government backlinks can put your magic website at the top of page one for Internet searches. That means you can be in position one or two! This eBook gives you the power to dominate Google.

It is the goal of every entertainer to have their website on the first page of a search engine's results. The biggest search engine of all is Google, and if your website is not on either the first or second page of Google, then you might as well not be in business, because few people will find you.

Here are the current click-through statistics based on your position. If you are in position one, you get 33% of the clicks. Position two is 18%, three is 11% and it continues to drop until position ten, which only gets 2.4% of the clicks.

It does not take a rocket scientist to realize that the higher up the page you rank, the more calls and business you will get. You really need to be in the top four positions of the organic search results. Studies have shown that organic search results get more click-throughs than paid AdWords.
