

## **Almost Impromptu by Aaron Plener - eBook DOWNLOAD**

Almost Impromptu features 4 effects that require little to no set up and can be done any time, any where.

The effects included in the PDF includes:

- 1) ACYN (Any Card, Your Number) which is a take on an any card at any number but an impromptu version that can be done with a borrowed deck!
- 2) Card to Pocket which is my take on a classic impossible location effect.
- 3) Predicted Card which creates a connection between spectators and in the end shows that even when we are not trying to create a bond, we are always connected
- 4) Tic Tac Card which is an impromptu card to tic tac box routine in which a spectators signed card is torn into 4 pieces and held onto. 1 of the pieces ends up inside the tic tac box and all can be examined, start and end clean. As a bonus this routine can be done with a signed coin.

This 12-page PDF is filled with amazing almost impromptu effects that will add depth to your current repertoire.
