

Houdini's Last Transposition by Dan Hauss video DOWNLOAD

In the traditional homage to Houdini, Dan Hauss comes at you with an in-your-face double card transposition all based around Houdini's most famous exploit, the escape.

Watch as Dan selects two cards, then securely ties them down with a rubber band, only to see one selected card escape outside its confinement, to the top of his hand. In a shocking moment, you see one selected card instantly and visually trade places with the card on his hand, only to find that they have switched places, all while tied down, just like the timeless illusion, Metamorphosis that Houdini & Bess were famous for.

Hand out everything for inspection to leave your spectators with a moment they'll never forget.
