

## Clear Perception by Scott Creasey eBook DOWNLOAD

The clear force bag has been around for a long time and should be part of any mentalist's arsenal. They come in many shapes and sizes and range in style from the cheap and tacky to the over complex and expensive.

For the first time Scott explains how with basic tools you have at home, you can in about fifteen minutes, easily and cheaply manufacture the clear Zip Lock force bags he has been selling at his lectures for over ten years.

Also included in these 34 pages of photographic instructions are eight full routines suitable for platform or close up and taken from Scott's own working repertoire, effects that utilise either one or two of these bags and which haven't been released in print before now.

### Contents:

- Manufacturing the force bags
