

Tarot In Your Pocket by Scott Creasey eBook DOWNLOAD

For the first time outside of his lectures, Scott reveals one of his pet effects, Tarot in your Pocket perfect for one to one or large groups.

A twenty minute (or more) piece of psychic theatre you can carry in your pocket.

Scott explains in detail how to prepare your own props using just some blank cards and a sharpie (not supplied) Take eleven double blank cards with the names of the tarot written on them. Cleanly read the minds of various individuals and give them a Tarot and Numerology reading based on their free choices.

As a bonus Scott explains how, while across the room with your back turned, you can reveal the name of a randomly chosen Tarot card and give a reading based on that card.

Finally after all that use the same cards to carry out Scott's own (genuine) Internal triangle Tarot reading, and believe me, once you demonstrate Tarot in your Pocket you will get asked to do readings. Never done a reading before, no worries Scott explains everything you need to know.

Great. This will leave you asking why didn't I think of that. The reason is you are not Scott with his flair for developing simple ideas into full performable routines. This can be developed into a complete act and all you need is a few double sided blank cards and a five minutes once only preparation.
