Effects that will change your coffee experience

Your coffee experience will never be the same again.

EFFECTS :

ABSORB / Just by holding the cup you cause the liquid to subside and amazingly make it fill again.

INKCUP / Cause a mark to jump back and forth from the cup square lines.

OVERFLOW / Cause the coffee to filled and make it overflow.

HAUNTED COFFEE / Make a coffee cup move and rise by itself.

BEE STRAW / A straw, plastic spoon, or stick balance into the edge of a cup.

NOTE: *It doesn't need to be a Starbucks cup to make a gimmick, you can also make it like any other cup that some coffee shop or restaurant uses, we also notice that some fastfood or restaurant now a days uses the same cup for their drinks that Starbuck uses.*
