

Spinorama by William Lee video DOWNLOAD

A small packet of cards is placed on a table. The magician makes a motion towards them, and suddenly they get the impulse to spin. A half deck or full deck can also be used and will rotate at a slower speed. Can be done in the hand.

The Spinorama Card gimmick is a mechanical device which can be used to create a quick, flashy spin effect. Some Arts&Crafts materials required, (such as crazy glue, glue stick, putty, x-acto blade, hole punch) - plus some other inexpensive stuff. The gimmick has to be constructed. Best-suited for crafty builder types who enjoy mechanical projects.

Some cutting with a utility knife would require adult supervision

The principle can be adapted to make other things spin, such as a box of crayons, a DVD, a matchbox, etc.
