

## **HYPNO-TRON by Jonathan Royle - Video DOWNLOAD**

The Hypno-Tron is an Ergonomically Designed, precision made battery operated Electronic Device, that when used as instructed will enable you to Speed up your Hypnotic Induction Time dramatically and also help to increase the success of your inductions and to massively deepen the level of Trance you attain in your volunteers.

Whether used for Stage, Street or Clinical Hypnosis, you will find that having the Hypno-Tron on you at all times in your pocket will prove invaluable.

Within this Zip File you will get Text Files, Numerous Photographic Images and An Audio File.

Between these files you learn how to easily make and more importantly how to effectively use several different types of "Hypno-Tron" Electronic Speed Hypnosis Devices.

Not only will this help to Speed up your Inductions and deepen the levels of Trance that people rapidly go into, but also it will help ensure that all your volunteers GENUINELY feel that they have experienced "Hypnosis"

Yes this device will help ensure that they feel they have experienced something "Unusual" and "Magical" and "Special" and as you know the moment they believe this to be the case is the moment that the Placebo Process is triggered and they will far more easily and rapidly accept anything else you may suggest to them.

Other uses for the same little device are also revealed in the short audio instruction file.
