**Impress Your Friends And Family With Superior Intelligence!**

**Appear To Be A Genius!**

### **The Basic Effect:**

The performer has a whiteboard and an erasable marker. He tells the audience that as a young person he mastered the ability to recite the alphabet backwards. He demonstrates this by reciting it backwards at lightning speed. An impressive feat in itself. To increase his mind-power, he also learned how to WRITE the alphabet upside-down and BACKWARDS while reciting the alphabet FORWARDS! This appears that the performer is capable of doing several things at the same time.

The performer recites the alphabet forward while at the same time writing it backward and upside-down. A stunning feat that make the performer look like a genius. When he is done, he rotates the whiteboard 180 degrees and the audience sees all the letters from A to Z in the proper order and correctly written. This feat will get you a stunning round of applause and will in some cases result in a stand-ovation. YES, YOU CAN DO THIS IN YOUR NEXT SHOW.

This PDF will teach you how to have the audience call out words and you write them upside and backwards. This is a slightly more advanced technique, but you can do it after you become proficient in the basic effect. This can be used to promote your shows.

### **Reviews:**

"You will use this. I do!!"

- **Marc Salem**

"In the past, I learned how to recite the alphabet backwards, but this is much more. Once you go through the simple steps, and practice, you'll be able to recite and write the alphabet in all sorts of ways. Once you get this system down it will be something you have in your back pocket at all times. This is one of those things that will pay for itself once you take the time to put it into your arsenal."

- **Greg Arce**

"In my talks, I teach business people memory stunts and one of them is memorizing the alphabet backwards. They just absolutely love it. When I saw a copy of Devin's new PDF, I was very pleased with the work he has done pertaining to this stunt. As always, he has a great deal of unique ideas and approaches that he has applied towards this memory demonstration I wish I would have come up with, and I am definitely going to use them!"
