

Numbers by Rus Andrews and MagicTao - video DOWNLOAD

'Numbers' is a great twist on the ACAAN plot.

Imagine placing a prediction, openly in front of your spectator, and handing them a deck of cards.

You then ask the spectator to create a 2 digit number?

After the spectator has checked that the deck is a normal shuffled deck you ask them to deal down to the number they have chosen.

The card they deal to matches the prediction that they have had in full view the entire time.

This download also comes with a PDF that has 10 additional great routines by some great thinkers.

- Only one prediction
- Only one envelope
- Only one deck
- No switching
- No rough and smooth or sticky cards
- No forcing
- Deck is examined beforehand
- Instant reset

Included are:

- A Streaming Download with full explanations
- Bonus PDF with 10 additional routines

Supply your own cards.
