

Bottle Thru Body (Gimmick NOT included) by Tony Clark DONWLOAD

Just imagine wrapping a piece of paper around any size brown, green or clear bottle and magically penetrate it through someones body! Tony has taken the classic bottle thru table and created a "strolling" close-up illusion that will leave them shocked! The audience actually sees the top of the bottle sticking out of the paper as it is going through the body.

Also included in the instructional video you will learn two versions of the bottle thru body as well as an improved version of the bottle thru table. A very powerful effect that they will long remember!
