

A Aposta (The Bet / Portuguese Language Only) by Juan Araújo - Video DOWNLOAD

The magician talks about the game Three Card Monte, where there are two matching cards and the player must follow the odd card. Then he explains that he'll show a version with more cards, 8 equal (jokers) and one odd (6 of diamonds). When the spectator bets on the odd card, it is now shown that this card is a joker and all the other cards have become the 6 of diamonds. Everything is examinable at the end. This is a version of the effect "Incauto Tramposo" created by the Spanish magician Pepe Carrol.
