

New Assembly by Alessandro Criscione video DOWNLOAD

A new coin matrix made with just two cards...

Show four coins and two cards. Imagine placing one coin under one card, and a second coin under the other. The two remaining coins go under your left hand.

A magic gesture, and all four of the coins have regrouped under your left hand!

This is really possible with only a few moves, and it's all very simple to do.

What you waiting for? Buy it - you will not regret it.
