It's for people who love playing around with new ideas and want some freaking insane, yet deviously easy, color changes. These wildly visual changes are incredibly fun to play with in front of a mirror or in front of your camera. In this download, you'll learn multiple eye-popping visual color changes with over 35 minutes of detailed instructions by Vivek. They will blow your mind when you first perform them in front of a mirror. You most probably won't be able to stop performing them for yourself. They are seriously addictive!!!

Most of the changes are nearly impossible to nail in front of a real live audience 100% of the time, but they are super visual, super fun, and they get your creativity flowing.
