

## 1.8g by Matt Pilcher - Video - DOWNLOAD

The weight of a single playing card is 1.8 grams. There is a very tiny difference in weight from card to card due to the ink on the card. For example, a court card has more ink on it than the Ace of diamonds.

With **1.8g**, you will be able to demonstrate an extraordinary ability to locate a chosen card simply by the weight of the card. It's like telling the difference between holding one grain of sand and holding two grains of sand.

In this 20+ minute instant video download, Matt teaches you everything you need to know to pull off this trick.

Let's have a little rundown of what you will need for this effect.

- YOU WILL NEED -

A pack of playing cards... Yep, that really is it! They don't even have to be your playing cards, or even a full deck. No complicated gimmicks to make, no marked cards, no set-up.

Also, this trick is for ALL skill levels, so it doesn't matter if you're new to magic or if you've been doing it for years -- **1.8g** is well within your grasp.

Download the video and have fun showing others your new and amazing talent.
