

Canamla by Matt Pilcher - Video - DOWNLOAD

Canamla is a prediction-based card effect that has been put together wonderfully, by magic creator Matt Pilcher.

At the beginning of this effect, you place a prediction on the table. Your spectator shuffles the deck. They then cut the deck and take the card they cut to -- it's a perfect match with your prediction! It doesn't get much fairer, and NO it's not a breather crimp, and there are no short cards in the deck, and your prediction is never switched out.

You'll love the method!
