

## Mirage by Sandro Loporcaro (Amazo) video DOWNLOAD

A surprising production!

This new technique enables you to produce a glass of liquid (which you can actually drink!), a small bird, a cell phone, balls, or many other small objects. Begin by opening your jacket and rolling up your sleeves.

Nothing is visible, but it works like a **Mirage!** Great for many mentalism effects or even for the Cut and Restored Newspaper.

- No pocket
- No Topit
- No glue or rubber to pull off
- Easy to do
- Produce the object when desired
- After the production, you can continue your show

Download the video and learn how to miraculously produce an object seemingly from nowhere!
