

Pivot & Junk Change by Patrick Redford - Video - DOWNLOAD

Two original coin changes taught in expert detail.

The **Pivot Change** is a "Spellbound" style change performed at the fingertips where both hands appear to be empty before, during, and after the change.

The **Junk Change** is a visual explosion of one coin or object into many other different objects all at once. Watch as one coin visually explodes and changes into a handful of pocket change!

Both moves are practical under real-world performing conditions and are within the reach of those proficient in basic sleight of hand.

Run time: 13:32
