

Kerigma Searchers by Fenik - Video - DOWNLOAD

A chosen card is lost in the deck. The magician shows two face-up black Kings on top of the cards. Then, with just a little slap, the Kings visually disappear. The deck is now spread, and the Kings are found in two different spots separated by 20 cards. The deck is squared up again and is placed on the table. The magician makes a magic pass over the cards; the deck is spread on the table and the black Kings are now together with only ONE card between them -- the chosen card! No culls, no passes, no moves, 100% clean, thanks to Fenik's new technique.

Download the video and learn this great routine.
