

## At The Table Live Jonathan Friedman April 4th, 2018 - Video - DOWNLOAD

As a professional musician turned magician and author, **Jonathan Friedman** knows how to engage an audience and garner rave reviews. He's the winner of the 2015 Vanishing Inc "Trickie" Award for Best Magic Book, *The 80's Called... They Want Their Magic Back Vol. One*, and author of the upcoming *The Magic of Jonathan Friedman: The Musical!* You won't want to miss this lecture! On this edition of **At The Table**, you'll learn:

**Time Passages:** A BRAND NEW concept that allows you to accurately predict or reveal a spectator's freely-selected time of the day or night in an ultra-visual way!

**The Fifth Fourth:** An updated twist on Harry Anderson's "Gang of Four" effect that uses your own business/blank cards. Multiple presentations are discussed allowing you to showcase your own personality with an impossible prediction, a believable sucker hook, and a kicker-ending that truly kills.

**Auto Repeat: Disengage:** A playing card and the rest of the deck change places right on the spectator's outstretched palm. Impromptu, fooling, and funny!

**In Clenched Fist:** A multi-phase coin-through-hand routine that uses only one coin and a few funky moves.

**Selectigami:** A selected card is revealed like a secret message within the folds of a "coded message" written on the back of an indifferent card.

**Thumbs:** Like a hot knife slicing into a stick of butter, your thumb visually melts through the top-half of the deck, stopping at the spectator's chosen card.

**Supergroup:** Sixteen of the world's greatest rock stars are put through a spectator-led "battle of the bands" shuffle/elimination free-for-all, only to become the predicted ultimate "supergroup" of all time. A personalized twist on John Bannon's "Origami Poker" that would make even OZZY proud.

**ABC, 123, ESP!:** Numbers, letters, and ESP symbols chaotically combine in order to find a selected card in an "easy on the eyes" manner not usually found in your basic "counting, spelling, mindreading" combo trick.

**The Perfect Match:** A drawing of a wooden match on the back of an indifferent card visibly ignites as it becomes "the perfect match," as well as being "the perfect match" to a previously selected card.
