

## Thruttle by Abdullah Mahmoud - Video - DOWNLOAD

Imagine borrowing any plastic or glass bottle, and coin. Have the spectator sign the coin -- then visually you throw the coin inside the bottle! This is unlike any other Coin Thru Bottle effect.

- No magnets or PK rings -- only one coin is used, and it's signed
- Everything is borrowed
- It's easy to do -- you'll master it in a few minutes!

Download the video and learn this amazing effect!
