

Fly Knot by Agustin - Video - DOWNLOAD

From the mind of AGUSTIN comes a unique and amazing effect of rubber band magic.

Combining two plots, Transpo and TnR (Torn and Restored), it will leave your audience with an impossible and beautiful miracle.

Show two different colored rubber bands, and give one to the spectator. Break the other rubber band, tie it, and put it in your hand. Then with a little shake, the knot vanishes. Ask the spectator to open their hand - astoundingly, they will find the missing knot tied to their rubber band!

- Highly visual
- No gimmick
- Easy to do
- Examinable
- Give the rubber band as a souvenir
