

CAAN - Change At Any Number by Zack Lach - Video - DOWNLOAD

An amazing trick -- you change the spectator's card without touching anything!!

The spectator selects any card and it is lost in the deck. They then select any number between 1 and 52. The random card found at that position is then placed face up at that number. Upon counting again, that random card has now turned into the spectator's selected card!

Download the video and begin performing this incredible effect!
