

X-Static by Ben Williams - Video - DOWNLOAD

X-Static is a quick and visual effect where you cause borrowed objects to be attracted to each other, seemingly using static electricity.

"**X-Static** is your new favorite impromptu effect - guaranteed!"
- Dave Forrest

Meet **X-Static**... It's going to become your new favorite impromptu effect! That trick you do on the spot when someone asks you, "show me some magic". **X-Static** is the effect you 'go to' anytime, because it's perfect even when you have nothing on you.

Anywhere you like... without gaffs, props, or any set-up. No sleight of hand to worry about. Simply start causing things that belong to your spectators to bond together!

There are no magnets, no glues or sticky tape... the two items stick together whenever you want. You can even hand them out for examination... there's nothing to reveal your secret.

Very easy to do

No glues or sticky tape

Items can be borrowed

Full routine taught

Ideas for multiple items

Can also be performed as a bar bet

35 minutes of tutorial
