

## **NUCLEUS: Center Tear Made Easy by Abhinav Bothra - eBook - DOWNLOAD**

Stealing someone's information without their knowing is a tool with LIMITLESS POTENTIAL. And being able to do it REALLY CLEANLY AND FAIRLY, right under the nose of your audience, is a SUPER POWER in itself. **NUCLEUS** gives you the ability to do just that.

Inspired from Millard Longman's Acidus Novus, **NUCLEUS** is a center tear that is SIMPLE TO LEARN, EASY TO MASTER and LOOKS DEAD CLEAN.

### Features of **NUCLEUS**:

- **NUCLEUS** always opens to the correct side and in the correct orientation.
- It has a built-in feature that tells you whether the paper is right side up or upside down. This is really helpful when you do routines where it gets opened inside a pocket or away from sight.
- Can be done using regular printer paper.

Apart from the technique, you'll also learn:

- Short and simple routines developed specifically for stage, close-up, and for Impromptu situations -- all designed exclusively for **NUCLEUS**. These will help you build confidence for using **NUCLEUS**.
- A story-based routine that can be adapted into any setting (stage/parlor/walkaround) and in any language.
- You'll also learn justification for getting the information written down on paper and tearing it later.

Honest Note: **NUCLEUS** is both a center steal and center tear. It's like a 'Y' -- You start on a single journey but mid-way you part ways and reach different destinations.

Also, included is a 19-minute-long video to help you with the learning process.
