

IN-VELOPE by Stefanus Alexander - Video - DOWNLOAD

Solid Through Solid effects are so visual and magical -- they make spectators speechless.

Here's a new effect from Stefanus, the creator from Indonesia who created many tricks like "Infinity Box," "Insert," "STEAL Change," and many more.

Now, he has made a new Solid Through Solid effect with a beautiful routine.

First, you borrow a small object from spectator (coin, key or ring), then they sign it.

Second, you show the envelope to the spectator, and **THEY CAN EXAMINE** the envelope.

Third, you take the envelope and the spectator's object. With a magical move, that very object is now inside the envelope **WITHOUT OPENING THE FLAP**. It happens right in front of their eyes.

Also, you can empty the envelope, bringing the object back to the **SPECTATOR'S HANDS**.

Fourth, now you borrow some paper money from the spectator (they can sign it too, or simply write down the serial number). Then another miracle happens - the envelope passes through the money, and again the spectator sees this impossible vision!

For the **LAST** time, the spectator **CAN ONCE AGAIN EXAMINE** the envelope and anything after this incredible piece of magic.

- Instant reset
- **VERY** easy to do
- Always ready at your pocket
- Perform anywhere, anytime to anybody
