

Fun Zone by Sandro Loporcaro (Amazo) - Video - DOWNLOAD

Do you have to perform in front of children or do you want to animate a party? In this video, Amazo teaches two different effects that are perfect for these occasions!

- Balloon Detector for comedy and pretend "bad child": The magician waves a plastic stick having a balloon on top, in trying to determine who is a "bad child." The child who agrees to pretend they are the "bad child" is stunned when the balloon explodes as the magician approaches him or her. Perfect for stage comedy.
