

## Gum Stick Trick by Mike Clark - Video - DOWNLOAD

From the creator of Revise 5!

**Gum Stick Trick (GST)** is a perfect companion trick to go with Revise 5 but is also an incredible stand-alone effect!

Take a piece of gum and hold it up. The spectators clearly see it's green. With just a quick, magical wave of the hand, it turns red. But it doesn't stop there! That same red piece with another wave turns blue, but not just one side -- BOTH sides are blue!

No switches, no palming of any kind. **GST** is easy to perform and it's extremely visual.

Download and learn how to make this incredible effect today!
