

Blowing Smoke by Juan Pablo Ibañez - Video - DOWNLOAD

This is a complete routine that can be performed to music or as a parlor effect.

It is made up of modern effects and props that you can find just about everywhere. Preparation can be done in just a minute and can be performed in most environments due to its great angles.

The opening effect is the appearance of a filled wine glass. Later a match transforms into a cigarette. Next, a flame is lifted out of its lighter with naked fingers to light the cigarette. After filling the glass with smoke, an entire flower is produced from the mouth of the glass to end the routine. It's beautiful!

Download this video and learn this amazing routine.
