A unique and visual rising card effect!

In **Creepy Card 2.0**, your spectator selects a card and you put it on the bottom of the deck. You then put the deck inside the box and, with a shake of the hand, the card moves a little bit up from the bottom of the pack. The spectator can see this happen visually! It looks eerie! You shake it again and the gap visually moves closer to the top. With one final shake, their card has now moved to the top of the deck! It is turned over to reveal that it is, indeed, their selected card.
