## RBTC (Rubber Band Through Card) by Chris Annable -Video - DOWNLOAD

Amazing solid-thru-solid demonstration!

Pierce a hole into a standard playing card or business card. Then visibly link a rubber band through it!

After a clean and visual display of the impossible object, melt the rubber band out again and hand out the items for inspection.

- Completely impromptu
- No slits, tears or gaps
- No gaffs (use any standard card and rubber band)
- Great angles
- All parts are examinable!

Download the video and perform this great magical feat!
