

## Pilcher's Sniper by Matt Pilcher - Video - DOWNLOAD

OKAY... SO... How would you cut directly to a spectator's card? Or a four of a kind? Or a winning poker hand?... Use a short card? A crimp? Stripper deck? Sure you could do it that way, BUT that's the old way. The new way is using **Pilcher's Sniper**. So, let's break it down. A card is chosen at random, replaced in the deck, the deck is then cut however many times you wish and when you want to, you can cut DIRECTLY to their chosen card. To make it even more impressive, you can do it blindfolded! Yes, really!

There are:

- NO short cards
- NO pinky breaks
- NO stripper deck
- NO crimps
- NO marked cards
- NO bent corners
- NO punches
- NO nail nicks
- NO 'seer type' gimmicks
- NO adhesives
- NO card tracking
- NO protruding cards
- NO outjogs/injogs

But what there is instead, is **Pilcher's Sniper**. A brand new, unique way to be able to cut directly to the card or cards you want, when you want.

Download the video and learn how to perform this remarkable feat!
