

One Fly by Alessandro Criscione - Video - DOWNLOAD

Hey guys! This is my favorite routine taken from "Systema", partially modified by me.

I prefer this version because it's really visual!

The magician shows a coin on both sides, and then it magically flies from one hand to another.

He places the coin in the other hand, and it very visibly passes into the opposite hand.

Now the magician rests the coin on his forearm, and the coin incredibly lands in his hand.

In the end, the coin disappears. You and your audience will love all the layers of this amazing routine!
