

The Fortuitous ACAAN by Abhinav Bothra - Mixed Media - DOWNLOAD

A virtually self-working ACAAN with plenty of audience involvement.

We all know whenever the audience tries to reverse engineer or recreate a trick and fail at it; they conclude with a common statement - he must have done something sneaky.

The Fortuitous ACAAN works to counter just that. It brings wonder out of the hands of the performer and, at the same time, ensures that the control always rests with him.

Here is how it goes:

A deck gets shuffled by 4 people while 3 other people decide on the number, value and suit. The shuffled deck is collected and the cards are dealt face up. Amazingly, the card appearing immediately after the named number is the decided-upon card!

Features:

- Involves up to 8 participants
- Examinable deck (uses only 52 cards)
- Cards can be dealt FACE UP
- Looks like a self-working wonder
