

T.A.P. The Automatic Prediction by Abhinav Bothra Mixed Media - DOWNLOAD

21st Century Playing Card Prediction without using playing cards!

The performer, caught without props, picks up a piece of paper and writes his prediction. The prediction is given to an audience member to keep it secure.

The performer explains that he is prepared for moments like these. He further says - "A few weeks ago, I shuffled a deck of cards. I then dropped them individually on a table and asked a friend to film it. Let me show you!!"

He then plays a video and demonstrates how the video can be played and paused. Next, the video gets played once again and the performer holds his cellphone by the corners, screen side down. The participant pauses the video whenever he/she likes. The phone is turned screen side up, and it is found that the video is paused at a playing card.

The prediction is turned over and it is a perfect match!

- Instantly repeatable
- Doesn't need Internet
- Uses only your cellphone
- No special application needed
- Comes with the video you need
- Easy enough that you can do it half asleep

Download the eBook and video and learn this great effect!
