

Intuition by David Devlin and AMG Magic (English Version) - Video - DOWNLOAD

A cased deck is placed on the table. You remove your wallet, and also place it on the table. Both are on the table, and they are there in *full* view before *anything* happens. You tell the spectators that you removed one card from the deck, and put it in your wallet. A spectator then makes a series of choices bringing her to one card. The spectator herself removes the deck from the case, and deals the cards one at a time to the table. There are only 51 cards. The thought-of card is missing. You then open your wallet, and remove a card. It is the thought-of card!

This is a "new" method for the classic effect, ***Premonition***, by Eddie Joseph, which came out back in the 1950's. This effect has been a mainstay in David's working repertoire for many years, and has floored lay audiences, magicians and mentalists.

- Only *one* deck is used.
- *No* memorization.
- *No* switches of any kind.
- Perfect for close-up, platform, and even stage.
- There is absolutely *no* sleight of hand (no palming!)
- *No gaffed wallet!* Use your own.
