

COINS THRU TABLE by Paul A. Lelekis - eBook - DOWNLOAD

Before we begin, understand that this **COINS THRU TABLE** routine can also be used as a **Coins Across** routine, which is a routine I've been using for about 28 years while table-hopping. I also use this routine when lecturing - *it is a winner!*

This routine is unlike any other routine you've seen.

5 coins are used (*one contrasting coin*) and all are regular coins! No shells, no hidden props, no gaffed coins are used!

Carry these 5 coins in your pocket and you will be ready to perform an impromptu miracle that will really \"shake up\" your spectators (*watch their faces!*) - **and** it's simple to do!

In addition, there are NO weird sleights or \"knucklebusters\" used in this routine! It's routing in its purest form!

However, I have included a *subtlety* with the **COINS THRU TABLE** routine that make this effect, a REAL JAW-DROPPER!

The **COINS THRU TABLE** routine will really \"disturb\" your spectators and will even fool magicians!

This is a professional routine that is impromptu as long as you carry the coins with you.

Download the eBook and video and enjoy learning this fabulous routine!
