

Hypno Band by Stefanus Alexander - Video - DOWNLOAD

HypnoBand is a cool effect.

"Hypnotize" a rubber band and command it to move. It begins to move up or down -- right in front of your spectator's eyes! Looks quite magical!

This trick needs no special gimmick. Use any rubber band - it is not specially altered for this effect! You can perform this any time, anywhere. Also perform it with the spectator's own rubber bands.

- No invisible thread
- No loops
- Can borrow the spectator's rubber bands
- No gimmick
- Practical
- Easy to do
- Visual
