

## **Blockbuster Book Test by Stephen Ablett - Mixed Media - DOWNLOAD**

Blockbuster is a movie theme book test that can be performed close-up, table hopping, in a children's show or on stage. There are several live performances followed by a full explanation of the variation principles used. There are three stages to my routine including a quick flashback revelation, a first letter type reveal, and a prediction ending.

The book can be purchased from most know book shops including Amazon and can be fully examined. Furthermore, the movie title is in an extremely large font making it easy to read without glasses and from a distance.

The movie revelation allows for some entertaining patter that help brings comedy to your routine, as well as being familiar with your audiences.
