

Thumbs Up by Damien Fisher - Video - DOWNLOAD

Take the key and lock me up... lock me up!

This escape is fairly simple but packed with action. If you are a beginner this vanish is perfect and your spectator will be shocked with the final effect.

But, don't be fooled it takes skill and good sleigh of hand to produce the three phase routine. First the escape, and then the vanish and finally the reappearance of the thumb cuffs!

Your spectator will lock you into the cuffs, only expecting you to escape. All you will need is a set of thumb cuffs and a rayon scarf.

It is very visual and can be performed close up or stage. The routine is fast, and with practice you will be able to perform it with ease... Just take the key and lock me up!
