

The Vault - MORPH by Nacho Mancilla Mixed Media - DOWNLOAD

Picture perfect visual magic unlike anything they have ever seen before!

From the brilliant mind of Nacho Mancilla comes an incredible new visual change effect!

An old Polaroid photograph is brought out and placed face down on the table as a prediction. Your spectator now picks a card. When the photograph is turned over it is revealed that it is not a match. Not until you use the magic of light. As you shine your cell phone light through the photograph image of the incorrect card it slowly transforms into the correct selected card!

In the second effect you place a photograph down on the table as your prediction, your spectator is thinking of a celebrity and you show that your photograph actually does not match until you use the magic of light. You shine a light through the photo and now you see the incorrect celebrity's face change into the correct celebrity that they were just thinking of!

Note: There is some arts and crafts you will need to do to prepare the gimmick but it is easy to do and the download comes with all of the necessary files to print out and use.
