Mario Tarasini presents: Burmese Vanish 2.0 by Zaw Shinn - DOWNLOAD

If you missed out on the original Burmese Vanish because you did not like the setup, you cannot miss out on **Burmese Vanish 2.0**.

Zaw Shinn has created **Burmese Vanish 2.0** in pursuit to find the most visual effect he can do up close to the camera and it looks super clean and less set up.

This vanish effect is easy to do and it looks just like CGI.

No fancy set up is required and the material to make the gimmick can easily be found at home.
