

## **Moving Torn by Agustin - Video - DOWNLOAD**

You show to the spectator a single torn playing card.

Maybe they will think that you're gonna perform Torn & Restore effect, but you show them something different.

With a gentle shake you make the torn visually move to another corner.

It's look like a trick photography until you hand out that card as a souvenir.

This is an effect designed for those of you who want to play a quick visual effect anywhere.

Easy to do and easy to get people's attention.
