

MS Calculator (Android Only) by David J. Greene - Mixed Media - DOWNLOAD

The Magic Square is an arrangement of numbers on a 4x4 grid where all of the numbers in each row, each column, and the even the diagonals all add up to the same number chosen by the audience. But is it mental magic, or a feat of mathematics? That depends on the performer's presentation, and the ability to perform some simple calculations, all while concentrating on impressing the audience.

This is where **MS Calculator** comes in. Disguised as an Android calculator, **MS Calculator** does all the work for you! In addition, there are two separate presentations included, each with their own built in motivation for bringing the app into play. You are provided with a presentation for motivational speaking and a presentation focusing on comedy. Also included are two separate formulas housed within the app, taking away the worry about repeat performances!

"Magic squares are intriguing for millions. David's app and routine make it a miracle to remember!"

- **Andreas Dante**

With **MS Calculator** you'll be able to perform at a moment's notice and impressing people wherever you go! (Please note: This is currently available for Android only)
